

BBLs™

Versatile Aesthetic Treatments with Effective BroadBand Light

 SCITON®

BBL_S™ – BroadBand Light

Effective, Versatile and Powerful

BroadBand Light (BBL) gives physicians the opportunity to provide a broad range of aesthetic procedures in a simple system. The most complete and versatile broadband light system in its class, BBL comes as part of Sciton's JOULE™ platform or as a standalone system, BBL_S.

Broad Range of Aesthetic Procedures

BBL_S BroadBand Light is the perfect choice for a broad range of treatments including permanent hair reduction, acne reduction, dermal rejuvenation, microvasculature reduction, and benign pigmented and vascular lesion reduction.

Predictable & Consistent

Significant skin improvement can be achieved non-invasively with the BBL_S. Consistent and reproducible clinical results make the BBL_S a highly desired part of aesthetic practices.

Personalized Treatment & Visible Results

With the broadest range of wavelengths, physicians can personalize treatments to fit each patient's needs. BBL_S requires fewer treatments to achieve visible and superior results than other IPL systems.

Treatment Expansion – Skin Firming

SkinTyte™ can be added as a separate module to the BBL_S system. It employs infrared light energy to deeply heat dermal collagen leading to a renewed collagen foundation and increased skin firmness.

Fast and Cost Effective

BBL_S delivers the fastest and most economical phototherapy treatment on the market.

Fast

With a large 15 x 45 mm spot size and a rapid repetition rate, one can treat more patients in less time with BBL_S.

Unsurpassed Return on Investment

The BBL_S' dual-lamp technology extends the lifetime of the handpiece eliminating excessive replacement costs and yielding exceptional ROI.

Safe and User Friendly

The revolutionary dual flash lamp technology, Smart Filters, Finesse Adapters, and precision thermoelectric cooling make BBL_S safe and easy to use for physicians.

Powerful Cooling

BBL_S employs an integrated, thermoelectrically cooled, sapphire crystal that keeps the treatment area consistently safe and cool with precise temperatures from 0° C – 30° C.

Interchangeable Smart Filters™

Quickly and easily change wavelengths without interruption with BBL_S' Smart Filters, enabling treatment of various skin conditions with a single handpiece.

Finesse Adapters™

Magnetically attached Finesse Adapters allow physicians to treat hard-to-reach areas and different facial structures. Available in three convenient sizes.

The Sciton Edge

Complete Aesthetic Solution – Sciton’s BroadBand Light comes as part of Sciton’s JOULE™ platform or as a standalone BBLs™ BroadBand Light system. JOULE provides the widest array of aesthetic and surgical procedures available on a single, expandable system. The standalone BBLs gives physicians the opportunity to utilize the power of pulsed light to provide a broad range of aesthetic procedures on a single, compact system.

A Secure Investment – JOULE is enabled for tomorrow’s technologies and applications so your laser system will not become obsolete. The laser system provides an upgrade path as procedures evolve. Other aesthetic treatment modules can be added to your JOULE, increasing your incremental revenue without the purchase of another full-priced system.

TopFlight™ (U.S. only) – We have partnered with experienced third-party professionals to guide you through the integral aspects of building a cosmetic practice, including business development, marketing strategies, product training, and certification. TopFlight membership is included with most Sciton laser purchases, but please first consult Sciton to confirm your membership.

Practice Support – As part of Sciton’s commitment to your success, we provide practice assistance through a Practice Support Kit. This kit includes a comprehensive set of materials that will enable you to easily incorporate the new aesthetic treatments into your practice and to effectively market the treatments to prospective patients.

Clinical In-Service – For non-surgical module purchases or upgrades, Sciton will provide all customers an in-depth clinical training with a credentialed clinical educator. This training is necessary to ensure you and your staff learn proper technique, utilize the most up-to-date Safe-Start protocols, and achieve maximum proficiency when operating your new Sciton system.

Physician Locator (Available in certain countries) – With the purchase of a Sciton laser, you will be listed on Sciton.com’s Online Physician Locator. When patients in your area enter their city or zip code into the Physician Locator, they will be given your contact information as being a nearby physician who offers Sciton treatments.

Specifications

Wavelength	420 – 1400 nm
Filters	420, 515, 560, 590, 640, 695 nm
Output	Up to 30 J/cm ²
Pulse Width	Up to 200 ms
Repetition Rate	Up to 1 pulse-per-second
Cooling Method	Continuous thermoelectric sapphire plates
Skin Cooling	Adjustable from 0 °C to 30 °C
Spot Size	15 x 45 mm
Finesse Adapters	15 x 15 mm square, 11 mm & 7 mm round
